BOOTSTRAPPING YOUR FLIP-FOPS: CREATING A STARTUP ON THE ROAD

HACKER PARADISE

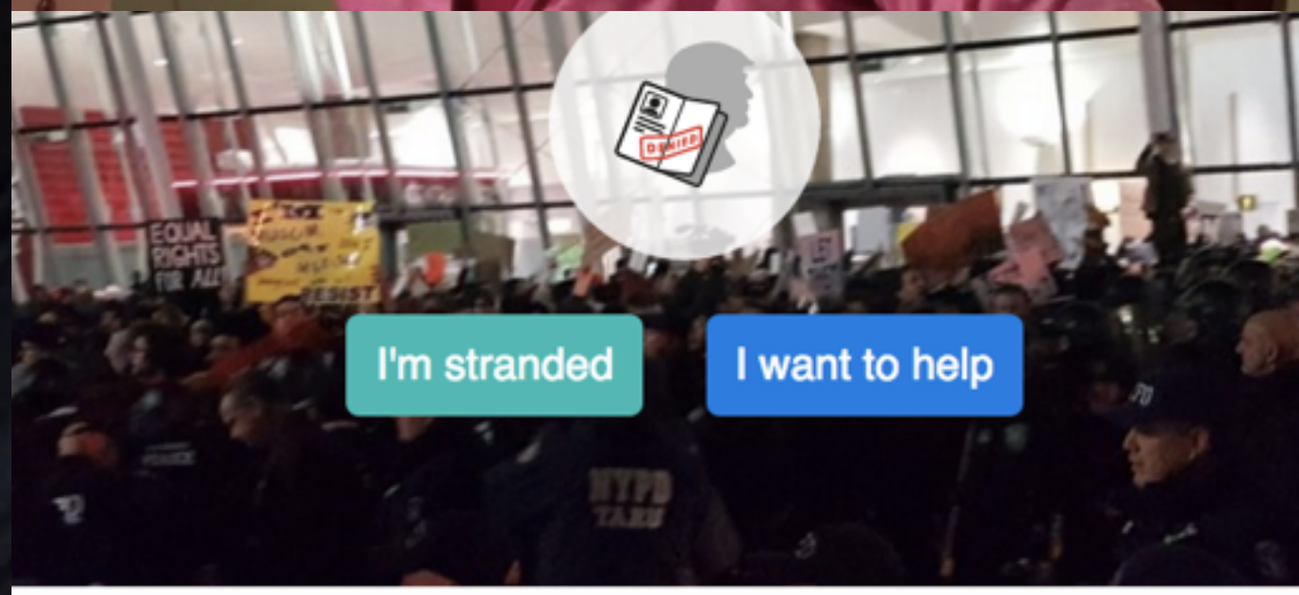

SUPER PRIVILEGED WHITE GUY:

“I ONLY WORK REMOTELY.”

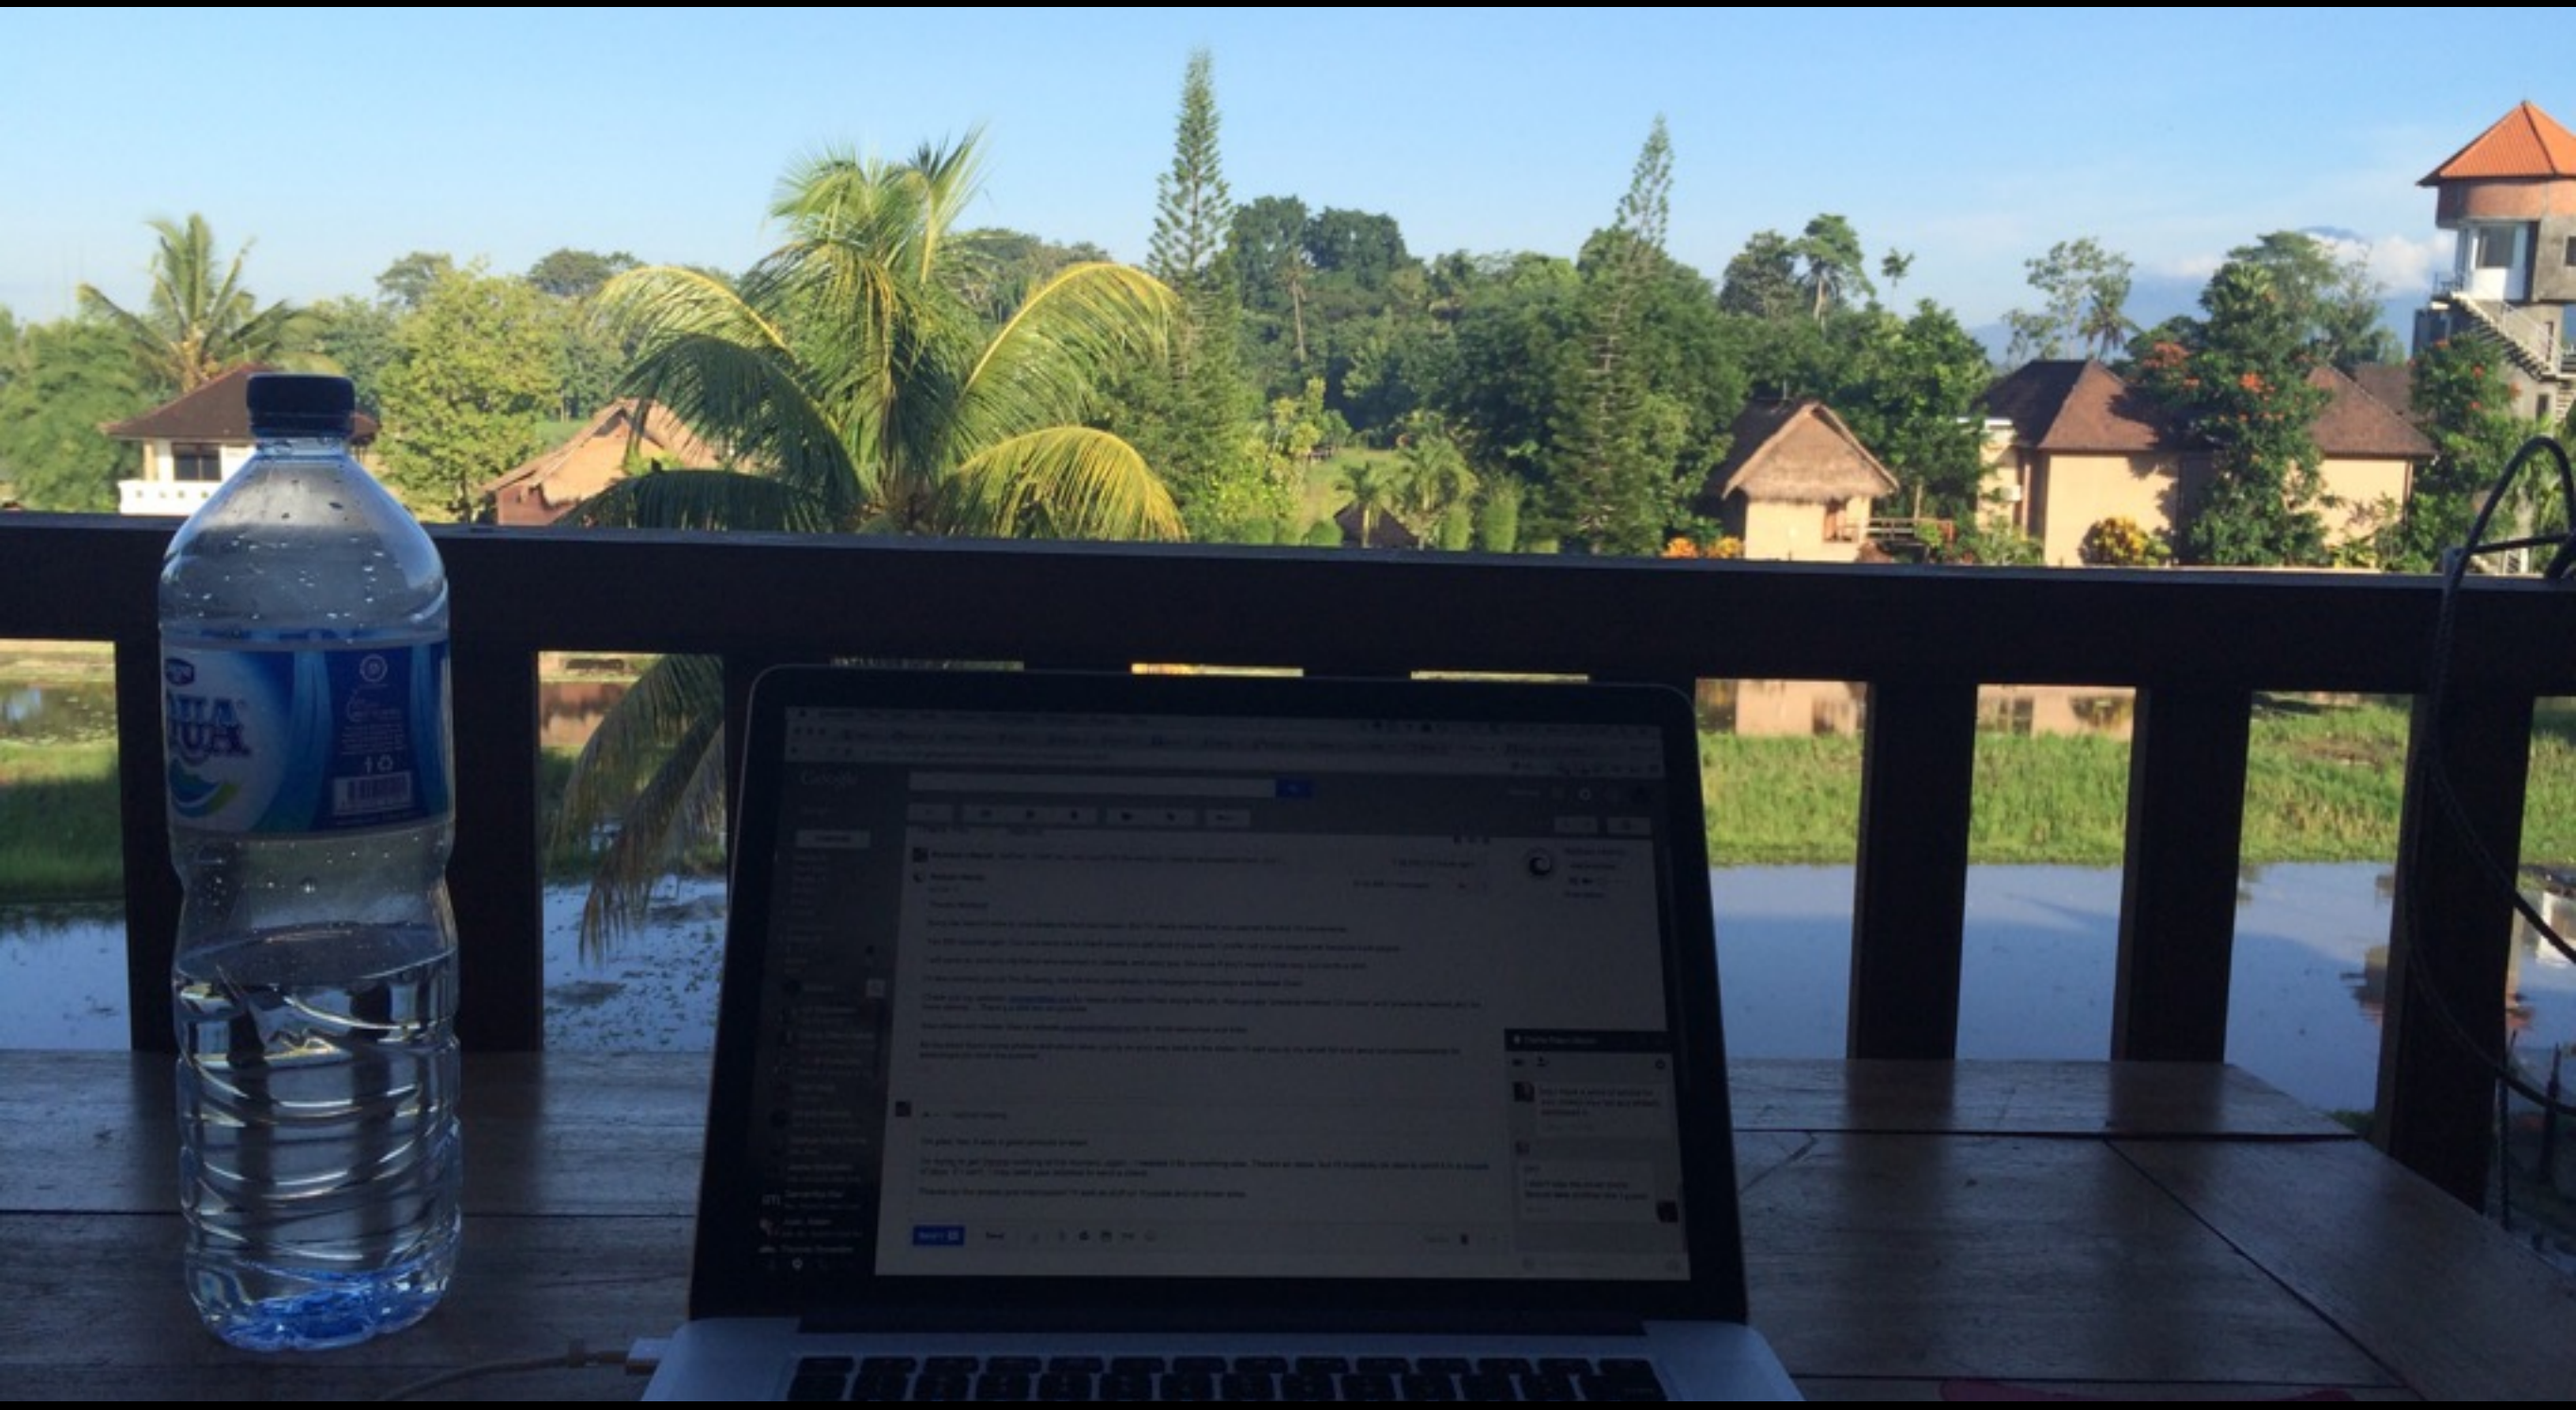

Fight the #MuslimBan Right Now

On Jan. 27, President VoidBeast banned entry to the U.S. for citizens from Iraq, Iran, Libya, Somalia, Sudan, Yemen, and Syria.

AT WORK IN BALI

DRINKING IS PRETTY FUN SOMETIMES...

...WHY NOT AT WORK, TOO?

THEUSERISDRUNK.COM

Your website should be so simple, a drunk person could use it.

You can't test that. I'll do it for you.

I'll get very drunk, and then review your website. I'll send you my screencast; you'll get a video of me, as a new user, and as a designer trying to keep it together.

I am a UX professional and full stack developer. I've been doing this for a long time. Here is my website, my github, and my twitter.

One of the core tenets of UX is that you've got to design like "the user is drunk." Any feature of your site has to be able to be used by someone who could be drunk - because, invariably, the user will mess it up otherwise. Wonderful idea. The thing is, it is hard to test.

I and a lot of beer will test this for you.

"The User Has Sobered Up."

–RICHARD "THE DRUNK GUY" LITTAUER

THE USER: PART II

THE USER IS MY MOM

MEET SCOTTY ALLEN

FRIENDS ARE AWESOME

THE "MOM"

MEET PAM

Dear internet:
My mom is tired of your shit.

She can't understand your website and it isn't her fault.

It's time we talked.

My mom will review your website. We'll send you a screencast, with some motherly UX advice.

Get in touch for pricing and availability. Email us.

My mom tutors high school students and likes quilting and hiking. She yells at her computer, doesn't know what a twitter is, and struggles to find windows she's minimized.

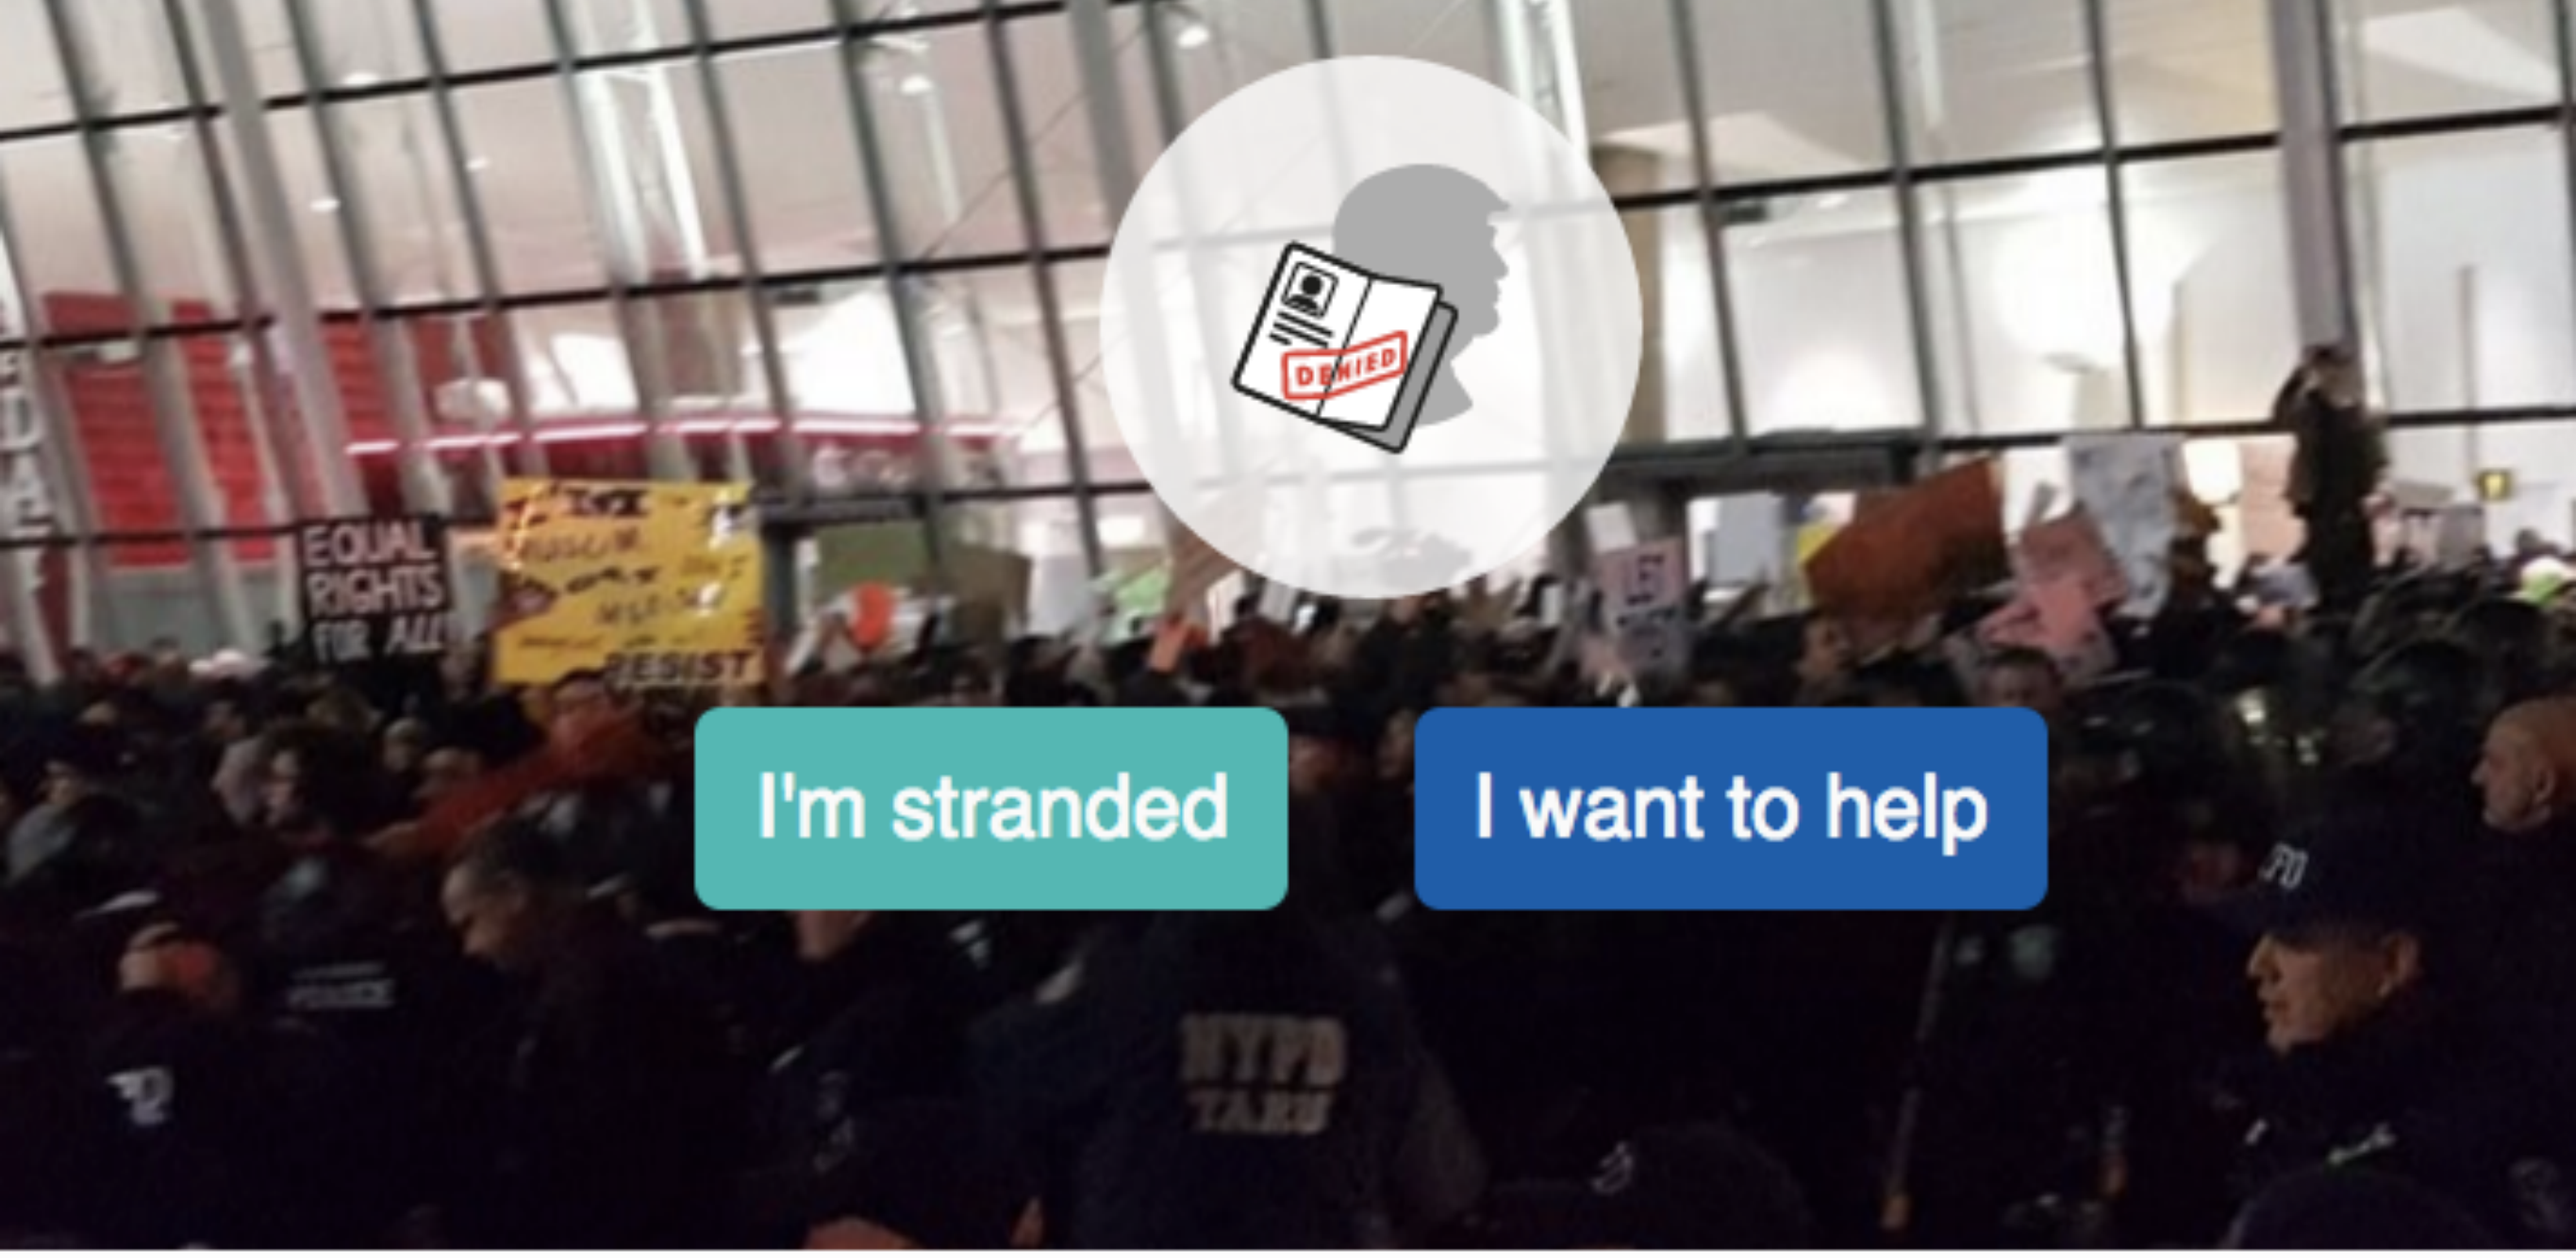

WHAT WE DID DIFFERENTLY

- Virtual Assistant
- Contract Beforehand
- Outsourcing (to Pam)

Cool.

- OUR REACTION

STRANDED BY TRUMP

Fight the #MuslimBan Right Now

On Jan. 27, President VoidBeast banned entry to the U.S. for citizens from Iraq, Iran, Libya, Somalia, Sudan, Yemen, and Syria.

HOW IT WORKED

- Put out a call on Slack
- 4 developers
